DETAILED ACTION

Election/Restrictions

1. Claims 1-22 allowable. The restriction requirement to claims 21 and 22, as set forth in the Office action mailed on March 29, 2007, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 21-22, directed to non-elected product claims are no longer withdrawn from consideration because the claim(s) requires all the structural limitations of the allowable process claims.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record are held to teach, reasonably suggest or render obvious the invention of claims 1-22.

For example, the prior art of record does not teach, suggest or render obvious the supporter layer applied within the at least one gas channel wherein the supporter layer comprise carbon or glass particles. This process step and structural feature in the construct of the claimed invention is held to be novel over the prior art of record.

Regarding the rejoinder of claims 21 and 22 which are dependent upon claim 13:

Claim 13 has been amended to include the structural feature of the first support layer comprising carbon or glass particles is within the at least one gas channel. This structural feature is not held to be reasonably taught, suggested or fairly obvious over the prior art of record. Therefore the structure of the fuel cell in the apparatus claims of claims 21 and 22 are also allowed for the similar reasons since the product of claims 21 and 22 include the structural feature of the first support layer comprising carbon or glass particles which is applied within the at least one gas channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
